## Face Shield Mask – Product Data Sheet

### General:

Palram 4U manufactures transparent protective masks – Face Shield. The mask covers the face from the forehead line to below the chin line. The **FACE SHIELD** use is to avoid droplets and splashes on the user's face.

### Face Shield drawing:

### Face Shield description:

- The Face Shield mask is personal protective equipment.
- Full face protection coverage. Under chin and ear to ear.
- High clarity - Up to 90% light transparency.
- Light weight.
- Adjustable plastic headband, by zip-tie mechanism.
- One size fit all.
- Reusable shield and easy to clean (by soap and water with a soft cloth).

### Face Shield structure:

- Mask body - Transparent and flexible plastic.
- Headband - made of flexible plastic material + spongy / rubber padding to forehead.

### Face Shield materials:

- Mask body - made of PET – MSDS will be provided upon request.
- Headband – made of PP – MSDS will be provided upon request.
- Spongy padding – made of foam PA30V – MSDS will be provided upon request.
- Rubber padding - made of PVC – MSDS will be provided upon request.

### Raw material toxicity:

The raw materials from which the mask is made, are non-toxic, do not cause irritation, and are suitable for the food industry.

### Standards:

The Face Shield meets CE requirements, according to EN166 and EN168.
